

Medical aid in dying: Practice guide and pharmacological guidelines

29 novembre 2019

A new version of the practice guide is now available in French for physicians and medical residents in the [secure section](#) of the Collège's website. Anyone else who would like to obtain the document may submit their request in writing to the address accesdocument@cmq.org.

Due to expected legislative changes following the Superior Court of Québec's judgement in the *Truchon v. Attorney General of Canada* case, further changes will be made to the practice guide in the coming months. For this reason, the document will not be translated into English until all the expected changes have been made.
